The Complete Home Fire Safety Checklist

A free homeowner guide from firealarms.id

Detector Placement (NFPA-Informed)

You need detectors

- ☐ Inside every bedroom
- ☐ Outside each sleeping area
- ☐ On every level, including the basement

Commonly missed spots

- ☐ Additions, converted garages, finished attics

Detector Age Matters

The 10-year rule

- ☐ Check the manufacture date on the back of the unit
- ☐ Replace at 10 years regardless of appearance
- ☐ New batteries don't reset the sensor's lifespan

Test monthly

- ☐ Use the test button to confirm alarm and battery backup work

Commercial vs. Residential

Commercial systems typically require

- ☐ Code-mandated compliance based on occupancy type
- ☐ Professional monitoring
- ☐ Certified installation and regular inspection
